Hi All,

It was great to catch up yesterday and get up to date on developments at your end.

I'm encouraged to see your plan and priority list, the interface part of the program is not something I've put much time into so far and I'm looking forward to seeing how you progress with it.

Let me know how you plan to proceed in relation to us working together on the same project file or if it would be better for my work to stay separate. Either option is absolutely fine with me.

I've managed to get a very basic version of the program working using the Line Renderer component now. It has bare bones functionality, but I think it's less messy than previous iterations. I've attached so you can take a look.

It also contains a scene I created where drawing adds extra polygons to a mesh. The other file contains the latest version of the program that used the trail renderer. Apologies for how messy this one is in terms of code and file structuring! Please feel free to get in touch if you need any info or clarification on anything.

Thanks again for your help with this project, I'm looking forward to seeing it develop.

Cheers,
Garry

Hi Garry

No worries, apologies for not getting back to you sooner. We're all free Tuesday to Thursday this week again so whatever works for you in those days.

Thanks,
Ross

Hi All,

Apologies for missing the meeting this morning, something came up.

Is there a time in the next few days that would suit you all. I'm currently self isolating, so I can be a bit more flexible with my time that last week.

Kind Regards,
Garry

Hi Garry,

Hope you're doing well with everything getting a bit chaotic lately.

We were hoping to have a meeting with you some time next week to further discuss the project and the direction it should take. Obviously we won't be able to carry this out in person, given the state of things, but we have a Webex Teams group that we can add you to if you're willing to sign up to that.

It's Easter holidays for us next week so we won't have any classes and we should be free throughout that week. Are there any days that would suit you best?

Kind Regards,
Ross Harvey
